

John Stanford International School (JSIS) formerly Latona Elementary School

4057 5th AVE NE, Seattle WA 98105

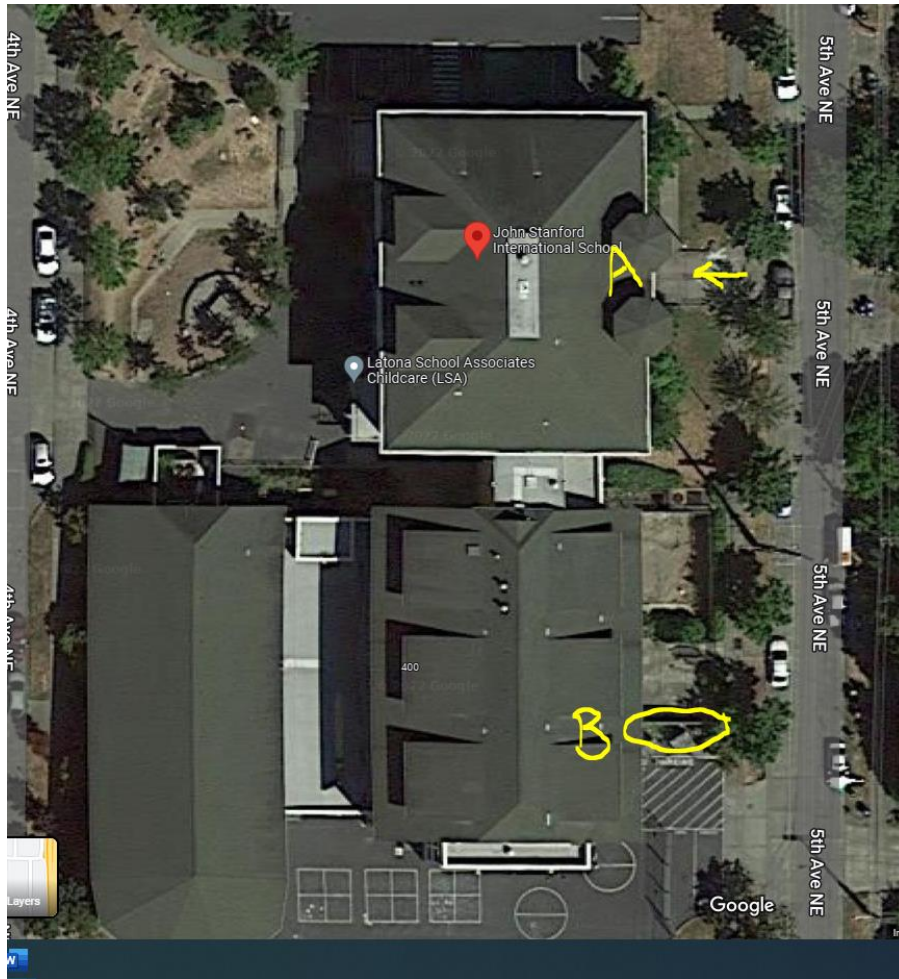

Childcare Provider Mural Project

Latona Elementary School section 1 was built in 1906. The architect was James Stephen. In 1917 Section 2 was constructed by architect Edgar Blair. In 2000 a 2-story addition and renovation by SvR Design Company added 17,000 sq feet in the form of additional classrooms, offices bathrooms, a kitchen, cafeteria, a library, gymnasium and covered play. The Childcare Provider Latona School Associates has operated an after school program from the John Stanford International School since 1985. They are active stewards of the site and wish to brighten up the space further with the creation of a mural on a concrete block divider wall that screens the loading dock from the play area and entrance to the afterschool program. The divider wall is currently painted light blue to match the building and measures 7'1" tall x 20' wide. The proposed mural would be painted on wood panels approximately 6'x19' and mounted to the wall. The divider wall is located on the Eastern side of the building south of the main entrance to the school. It sits below grade of the main entrance and is somewhat hidden by plant material and wrought iron fencing.

Aerial Image

A is the main entrance

B is the location of the wall the afterschool program lies just to the north and sits below grade from the main entrance.

Proposed Mural Location

The proposed mural is a landscape with an inspiration quote from Yuri Kochiyama. Students will paint utilizing bright colors. As part of the mural process Seattle Public Schools requires the use of an anti-graffiti coating and a date to be included on the mural.
